

# Choctaw Economic Development Authority (CEDA)

[EDA Agenda \(02-28-18\)](#)

## Who we are...

The Economic Development Authority works to create an environment in the City of Choctaw where business and industry can invest money in our community and receive a quality return on that investment; where every part of the workforce can find and maintain quality employment and earn a quality wage; and where citizens can enjoy life and prosper. Choctaw works hard to retain our hometown sense of community while offering existing and new businesses an exciting place to write their success stories.

**A great place to settle down...**Choctaw is a small community where the values of small town living merge with strong incentives for economic growth.
