PLAN

1. Site Plan

- A. All lot lines and lot dimensions.
- B. All existing and proposed building(s).
- C. Distance between lot lines and building (existing and proposed).
- D. Driveway with dimension.
- E. All existing and proposed utilities.
- F. All existing and proposed easements and right-of-way with dimensions.
- G. Building set back lines with dimensions.
- H. Drainage flow arrows.
- I. Location of 100 and 500 year flood zone boundary.
- J. Scale, North Arrow, Date, Contact information.

2. Documentation

- A. Well Log.
- B. Manufactures Designs (specifications). (if applicable)
- C. Engineer Design. (if applicable)
- D. Execute Easement. (if applicable)

**WATER WELL
APPLICATION GUIDELINES**

Rules and Regulations

Please fill out the attached application completely, date and sign. If any requirement is not satisfied, a reason is thereby created for the denial of a permit.

No person, firm or corporation shall drill or cause to be drilled within the city any domestic or commercial water well or make use of the water produced from any such well without first having complied with the provisions hereinafter set forth in this chapter. [Ord No. 459, 11/1/94]

No domestic or commercial water well shall be drilled without a permit therefore having been obtained from the city manager or his designee. Applications for such permit shall be made on forms supplied or approved by the city manager or his designee. Such applications shall, among other things, show the address and legal description of the property on which the proposed well is to be drilled, the location of the well on such property, the name and address of the owner of the property on which the well is to be located, and the name and address of the well driller. The applicant for such permit shall be required to pay a permit and inspection fee as set by motion or resolution by the city council. [Ord No. 459, 11/1/94]

Water wells may be drilled only by drillers who hold a valid water well drillers license issued by the Oklahoma Water Resources Board. **Within ten (10) ten days after completion of any work on a water well, the well driller shall provide the city with a well log and all other information and data required to be furnished by water well drillers under the current rules and regulations promulgated by the Oklahoma Water Resources Board** which are hereby adopted by reference. [Ord No. 459, 11/1/94]

No private domestic or commercial water well shall be drilled, re-drilled, deepened, constructed, or completed to a depth greater than two hundred fifty (250) feet below ground level at the well site. No such well shall be located nearer than a minimum of ten (10) feet to any properly line of the lot or parcel of land on which the well is to be located. [Ord No. 459, 11/1/94; Ord No. 586 11/23/2004]

Water from private domestic or commercial water wells located within the city shall be used only for domestic or commercial purposes on the premises where the well is located, and there shall be no interconnection system. The city, through its proper officers, shall be authorized to disconnect the premises on which a private water well is located from the municipal water system if it should be determined that the well has been connected with the municipal water system. [Ord No. 459, 11/1/94]

The owner of a water well shall not permit fertilizers, insecticides, or deleterious substances of any kind that might pollute the ground waters underlying the city to enter the well. [Ord No. 459, 11/1/94]

All water wells shall be open and accessible at all times for inspection and for the taking of water samples by the Oklahoma Department of Environmental Quality (ODEQ), the city-county health department, the city engineer, and other representatives of the Choctaw Utilities Authority or the city. [Ord No. 459, 11/1/94]

In the drilling, re-drilling, deepening, reconditioning, construction or completion of a water well, the well driller shall meet and comply with all minimum requirements and regulation of the Oklahoma Water Resources Board and of the ODEQ relating to water wells. No mud shall be permitted to escape onto an adjoining street but shall be hauled away and disposed of so as not to damage the streets or private property. Erosion shall be controlled in accordance with Section 18-101 et seq. of this code on surface water conservation, as amended. [Ord No. 459, 11/1/94]

When a water well is temporarily removed from service, it shall be sealed and capped as required by applicable rules and regulations of the Oklahoma Water Resources Board. If a well is nonproductive of water or abandoned for any reason, the well shall be filled with cement grout to at least four (4) feet below the land surface and the owner shall comply with all regulations of the Oklahoma Water Resources Board with respect to the plugging and capping of abandoned well. [Ord No. 459, 11/1/94]
